

The Reduced Cost Literature Application Policy and Procedure

The WSO has a new application form available for service bodies requesting reduced-cost literature for professional exhibits.

Intergroup Public Information and Professional Outreach

Committees may purchase literature through members of the Board of Trustees at a reduced cost when hosting health fairs and professional exhibits. The reduced cost is the higher of either the actual cost of the literature or 50 percent of the retail price. Shipping is extra.

The form provides space for listing the event, contact and shipping information; lists the available literature; includes guidelines for making a request; and requires the signature of an OA region trustee. A PDF file of the form is available for download.
